

CIRCUS RETURNS SHOW \$7 DEFICIT

New Institute Committee Takes Charge For First Time; Hold Elections

It was announced at the Institute Committee meeting held last night, in which the newly-elected members took part for the first time, that after all Circus expenses were defrayed, a deficit of \$7.35 remained.

Before the new committeemen took charge the old officers passed several motions which follow: Louis H. Flanders, Jr. '33, was appointed chairman, and George E. Merryweather, Halfred L. McKeever '34, William Brockmann '34, and Gorham K. Crosby '34, as committeemen of the Elections Committee; Roger P. Congdon '33 was appointed chairman of the Point System Committee, with Herbert R. Schwarz '34, as assistant; Robert G. Holt '33 was appointed chairman of the Budget Committee; and Stephen H. Rhodes '33 as chairman and Thomas K. Fitzpatrick '33 were appointed to the Senior Ring Committee. Leo P. Leino '32, chairman of the Dormitory Committee, submitted the elections of new members of the Dormitory Committee; the elections were approved. At the same time, Dramashop's point system was approved and March 17, 1933 was approved as the date for Junior Prom.

Gilman Thanks Retiring Committee

Donald B. Gilman '32, retiring chairman of the Institute Committee, thanked the members for their cooperation throughout the year and the Executive Committee for its assistance in the running of undergraduate affairs.

The new committeemen then took charge, with Richard L. Fossett '33, as president of the new Institute Committee, calling the meeting to order. Vacant offices were then filled by written ballot. Richard S. Morse '33 was elected vice-president, Wilbur B. Huston '33 was elected secretary, and Charles C. Bell '33 was elected member-at-large of the Executive Committee.

GETTING IS ELECTED GYM TEAM CAPTAIN

Frisby Is Chosen To Lead 1933 Fencing Team

Ivan A. Getting '33, a member of the varsity gymnastic team for two years, was elected captain for the 1933 season at the final banquet last night in Walker Memorial. Charles F. Feuchter '34 was chosen to succeed the retiring manager, Calvin H. Mohr '33, for the coming year.

Coach Hans Neudorf was the speaker of the evening. He presented plans for next season, particularly asking the men to get out and work early next fall in preparation for the stiff schedule the team will face immediately after mid-years.

Getting, an Edison scholar, has received the election after a very successful season. He ranked second only to the retiring captain, Ericson, in total number of points scored.

Frisby to Lead Fencers

Vincent C. Frisby '33 and Frank J. Bravel '35 were elected captain and manager of the Institute fencing team at a banquet which was also held in Walker Memorial last night. Frisby has been an outstanding swordsman during the past season, doing much toward the favorable record made by the fencers this season. Coach John Roth was the guest of honor at the closing banquet for the year.

CATHOLIC CLUB GIVES DANCE HERE TONIGHT

Catholic Clubs of Technology and Harvard will hold a joint formal dance in the Main Hall of Walker Memorial this evening. Music will be furnished by Ranny Weeks and Sammy Liner, both of whom have functioned successfully at other Walker affairs this year.

Tickets are \$2.00 per couple, and formal or summer formal attire will be in order.

Professor F. H. Slack Dies After Long Illness

Dr. Francis H. Slack, Associate Professor of Public Health and Director of the Laboratory of the Homberg Infirmary, died at the Baker Memorial Hospital yesterday after a long illness. He was a graduate of Tufts Medical College and had been connected with Technology since 1909. He was also Director of the Sias Laboratory in Brookline and a member of the Society of Bacteriologists, the American Medical Association and the American Public Health Association.

After completing his hospital training following his graduation from Tufts College in 1898, Dr. Slack was employed in the Public Health Department of Boston and later was made head of that department. In 1907 he went to the Kansas State Agricultural College where he was Professor of Bacteriology. Two years later he returned to Boston and began his work at Technology as an instructor. He received his associate professorship last year.

STYLUS BANQUET TO FEATURE PARODIES

Press censorship will be lifted tomorrow evening at the annual banquet of Stylus, THE TECH honorary society, when the new members will present a series of skits and parodies based on information which they have secured during the past year but which they have been unable to publish. The entertainments as a whole are aimed at student officials and student government and take place at an imaginary "Tim" college in Idaho.

A number of prominent Institute men have been invited to attend the banquet which is somewhat on the manner of the Gridiron Banquet held by the National Press Association.

ALDRED LECTURER TO DISCUSS TYPES OF FERRO-ALLOYS

Frederick Becket, President Of Union Carbide Company Closes Series

The scientific extraction of rare metals from their ores will be described by Frederick M. Becket, president of the Union Carbide and Carbon Research Laboratories, Inc., New York City, in the season's final Aldred Lecture at the Institute at 3 o'clock in Room 10-250 this afternoon. He will speak on the development of the ferro-alloy industry, a field in which he is internationally distinguished.

Dr. Becket is vice-president and director of the Union Carbide Company, the U. S. Vanadium Corporation, and the Electro-Metallurgical Company, and vice-president of the Haynes Stellite Company.

Among Dr. Becket's achievements are new methods in the production of chromium, tungsten, molybdenum, vanadium, and their alloys. He has also designed, built, and operated the largest electric furnaces in the world. As a result of his investigations the fields of welding, of stainless and rustless steels, high chromium alloys, and rustless irons have been greatly extended.

Dr. Becket is a graduate of McGill University, Montreal, and holds the degrees of Master of Arts and Honorary Doctor of Science from Columbia University. He is a member of the Mining and Metallurgical Society of America, the American Chemical Society, the American Society for Steel Treating, and the Iron and Steel Institute and the Society of Chemical Industry, London. He is a former president of the American Electrochemical Society.

LAST ALDRED LECTURER

FREDERICK M. BECKET

PROFESSORS TO DEFEND SELVES AT MOCK TRIAL

Professors in the Physics Department will be called upon to defend themselves in serious charges brought against them by the local Physical Society on Tuesday, May 10, at the Ole Plantation, 87 St. James Street, at 6 o'clock. At this time a banquet will be held, followed by a mock court trial. All students in Courses VII, IX-C, and XIV, as well as the instructing staff and graduate students of Physics, are invited.

Tickets are on sale for \$1.25 in the Physics Department headquarters. Those attending the banquet will adjourn to the Pops afterward. The Pops tickets are also obtainable at Physics headquarters.

VARSITY SLIGHTLY FAVORED AGAINST PRINCETON CREW

Harvard Nearer To Defeat Tuesday Than In Last Twenty Odd Races

'35 WINS RICHARDS CUP

Hoping to come through Tuesday's race with at least the three-length margin of Yale's victory over the Engineers, the Harvard varsity had a hard fight to pull themselves into their length-and-a-quarter lead. Coach Bill Haines' outfit was a far smoother and more powerful crew than it was in the Eli encounter but just seemed to lack the slugging power of the Crimson oarsmen.

After a hard drive at the start in which both boats hit a 42-stroke, they settled down to a count of 34. Rowing smoothly, the Engineers started to pull themselves into a short lead which they hung onto until the bridge. Under the arch, the Crimson stroke went up and the two boats came out on even terms. The Institute wasn't through, however, by any means, and a few more yards saw the Grey boat again in the lead.

Spurt Didn't Last

This last spurt proved short-lived, however, and the Crimson boat went out ahead for the first time. From then on it was Harvard's race, though she did not step out in front very noticeably until a hard sprint at the finish sent her into the winning margin.

Tuesday turned out to be the first time in three years that Cassidy, the Crimson stroke, has been jumped at the start. The Engineers' performance is made even more remarkable by the fact that the race was the closest that six of the men in the Harvard boat have had since they rowed together as freshmen.

Turning in a beautiful performance, the much-heralded Crimson Jayvees took the Engineers into camp to the tune of five and one-half lengths. Rowing over the Henley distance of a mile and five-sixteenths, the 150-pound encounter was almost the same story as the varsity race which followed it.

Romping home with a two-length lead, the freshman 150-pound crew won the Richards Cup race on Wednesday. The Junior boat followed them across the line and the Sophomore outfit came in some time later. By winning the event in the time of 5:44.1, the freshman boat eclipsed the old record by five seconds.

BATON CLUB HOLDS YEARLY ELECTIONS

Musical Clubs Present Last Concert Of Season

The Baton Club held elections for next year's officers at its initiation banquet held last Tuesday at the University Club in Boston. The elections are as follows: W. Olmstead Wright '34, president; Clarence W. Farr '33, vice-president; and Arthur L. Conn '34, secretary-treasurer.

Bringing a successful season to a close, the Combined Musical Clubs will give their final concert of the year at the Brookline High School on Saturday, May 7. Dancing will follow the concert, lasting until 11:45 o'clock.

A. S. C. E. OFFICERS INSTALLED AT DINNER

At the final dinner meeting of the student branch, A. S. C. E., the following men were elected officers for the coming year: President, Douglas M. Stewart '33; Vice-President, Paul Pettitmermet '33; Secretary, Clarence R. Westaway '33; Treasurer, John C. King, Jr. '33.

Speakers at the meeting were Mr. Frank Windsor, of the Metropolitan Water Supply Commission, who spoke on "Water Supply"; Mr. Theodore Whitney, the Whitney Engineering Company, whose subject was "Structural Welding"; and Professor C. M. Spofford, who gave a farewell talk to the outgoing members.

NEW HANDS

ONCE again the administration of Technology's student government passes into new hands; capable hands, we believe. One of the essentials of democracy is the perennial change of the leaders. This system doubtless has its advantages, but it has its disadvantages, especially when the tenure of office is as short as it is in student government.

One disadvantage is that by the time a man has become accustomed to the feel of the reins, he retires, and a new, more or less inexperienced man takes charge. This does not make for smoothness and continuity of government. It does, of course, keep a poor government from staying in power too long, but it also may remove a capable one before its full period of usefulness is ended. However, it is the only practical system of student government.

Student government offices are among the most thankless of the entire undergraduate activity system despite the fact that the men holding them have the entire responsibility of directing the course of student affairs. The work connected with a major office is great, and men accepting them are open to much adverse criticism; it is seldom that they hear a word of appreciation or praise.

To the new Institute Committee, we recommend that they execute their duties with as much vigor and judgment as they are capable of exercising, that they remember the missteps of their predecessors and avoid them, and that they recognize the responsibilities connected with their positions. We assure the Committee of our cooperation in furthering the best interests of Technology and wish them the best of luck.

"THE ENGINEER TALKS"

LAST spring at a special banquet of the Combined Professional Societies, the late Dr. Samuel W. Stratton suggested to the assembled engineers a plan that he had cherished for a number of years. He arrived from one dinner just in time to present his outline, and left immediately after to attend another important function. But during that short informal address, seeds were sown among the Societies for the student paper contest which is underway this year.

It is the pitiable plight of the present engineer, that he is helpless when it comes to presenting any kind of address. It was for just this reason that Dr. Stratton introduced the annual speaking competition. Realizing the value derived from such an opportunity, more than five out of a total of twelve member societies of the Combined Societies should take part, and aid in establishing the contest as an institution.

CONFUSED DONKEY

TO an already confused Democratic donkey, the results of the California primary must add further bewilderment. While for a time after the stampede of the House and the virtual death of the Garner boom, the battle for nomination narrowed to a Smith-Roosevelt fracas, the results of the California voting make the race a confused three-cornered affair. The supporters of the House Speaker have taken heart, and there are reports of a rejuvenated "Garner for President" movement.

Just what the confused donkey will do in convention, no one can say, least of all those boosters of certain candidates. Smith as a Catholic has little chance to interest Southern delegates. Roosevelt with the opposition of the Smith forces and the possible support of "favorite son" delegates after the first few votes, stood a fair chance of getting the nomination until this unexpected support of Garner. The whole matter is now more complicated than before. The donkey is confused, without a doubt.

PROMOTIONS

VOLUME LII of THE TECH announces with pleasure the promotion of David Horvitz '34 to the position of Associate News Editor and that of John S. Slosson '35 to the position of Sports Writer.

As We Like It

R.K.O.-KEITH THEATER
"Symphony of Six Million"

"Symphony of Six Million" at R.K.O.-Keith's is an excellent character portrayal with an overdose of artificial melodrama. Very convincing is the portrayal of the life of a Jewish family in New York's Ghetto; very disgusting are scenes such as that one in which the father cries out hysterically that he is very happy, and after ranting a little while, falls in a faint. A novel by Fannie Hurst furnishes the basis of this film, and true to that author's story, focusses on the intimate happenings of one section of humanity.

An enterprising son of the family becomes a surgeon and enjoys himself thoroughly alleviating suffering in the Ghetto for practically no financial reward. His family urges him to move uptown where they will all be more comfortable. Finally he consents, but is greatly disgusted by neurotic society women who visit his office. The son does not completely find himself until he returns to the beloved Ghetto.

M. H. Jr.

FRESHMAN PICTURES

All freshmen who have not had pictures made for the Dean's records should report to the Medical Department between 8.30 and 11 o'clock in the morning, or between 2 and 5 o'clock in the afternoon of any day except Saturday, to have them taken.

About two hundred members of the first-year class who have not had these pictures made are requested to have it done as soon as possible. There is no charge for this work.

FROSH INTERCLASS BASEBALL

Manager William Peterson of the freshman interclass baseball team requests that as many men as possible show up for the game with the Juniors this afternoon at 5 o'clock. So far only about nine men have reported each time.

NEW OFFICERS OF A. I. E. E. CHOSEN

Elections for A.I.E.E. officers held yesterday resulted in the election of Glenn A. Lowery '32 as chairman. He is enrolled in the General Electric option of Course VI, holds a degree from Ohio State University, and is a member of Tau Beta Pi, honorary scholastic fraternity, and the Glee Club. Donald G. Fink '32, editor of *T. E. N.*, was chosen vice-chairman. Charles B. Bryan '33 was elected Secretary and William A. Gray '34 was elected Treasurer. Both were on the Executive Committee during the past two years.

Two student papers will represent Technology at the A.I.E.E. regional convention held today at Providence. "Modern Elevators," by Henry L. Duncan '32, and "Electricity in Modern Medicine," by Ellwood W. Schafer '32, are the representative papers. There will also be papers representing Harvard, Syracuse, and other New York and New England colleges. A group of members will go to Providence today to attend the convention.

TABLE SERVICE

Very often, when you're studying for exams, it will do you good to go to

Lydia Lee's

Where good food is served in a comfortable manner.

Opposite
the new
Waldorf Astoria

Home of the famous swimming pool.
the SHELTON
at 49th and Lexington NEW YORK

When the Shelton opened (7 years ago) we began catering to college men and women. Gradually their patronage has increased; we feel safe in asserting that more students make the Shelton their New York home than at any club or other hotel. One reason for this is the free recreational features plus a desire to serve on the part of Shelton employees. Room rates have been greatly reduced. Rates from \$50 per month upward. A room from \$2.50 daily.

Club features (free to guests) are as follows: Swimming pool; completely equipped gymnasium; game rooms for bridge and backgammon; roof garden and solarium. Restaurant and cafeteria service at reasonable prices.

The smoke
you like... is
the smoke she
likes for you!

"I like to see a man smoke a pipe!"
You've heard your own girl say it, perhaps. You're sure to hear it wherever girls get together.

They puff away at our cigarettes. But they like to see us have a go at the "strong, silent man's smoke"—a companionable, time-proven pipe.

There is something satisfying about a pipe. It's a slow, reflective, hard-thinking smoke—or a calm, relaxing, restful smoke. The hunter's smoke, the fisherman's smoke, the engineer's smoke—a man's smoke, through and through.

And pipe smokers who know their fine tobaccos tell you there's no blend quite like the fine selected burleys of Edgeworth—the favorite tobacco in 42 out of 50 leading colleges.

Do try Edgeworth. Perhaps you will like it as well as most men seem to. Edgeworth is at your dealer's. Or send for free sample if you wish. Address Larus & Bro. Co., 105 S. 22d Street, Richmond, Va.

EDGEWORTH SMOKING TOBACCO

Edgeworth is a blend of fine old burleys, with its natural savor enhanced by Edgeworth's distinctive and exclusive eleven-step process. Buy Edgeworth anywhere in two forms—Edgeworth Ready-Rubbed and Edgeworth Plug Slice. All sizes, 15¢ pocket package to \$1.50 pound humidifier tin.

Here is a Choice in Suits

made by two famous houses

at

\$35

Charter House

tailored in the brighter long-wearing tweeds. Rather individual in their style. Some two trousers and some trousers and knickers.

Adler-Rochester

are perhaps the more conservative in style and furnish a choice in worsteds. All with two trousers.

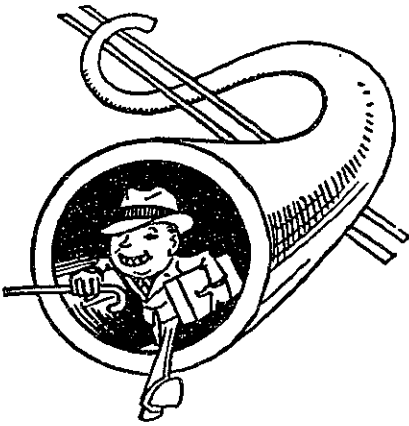

Both are the latest two-button model and have the new "snug" effect. You will like them.

Other suits at \$50 and a fine topcoat at \$25

Your Technology Charge Account is good you get a dividend too.

THE COOP

HARVARD SQUARE

It's a pipe to come through the large end of the horn, even in a year like this — if a man will only buy when the saving's good.

You need a *Spring* overcoat (misnomer for the lightweight coat you need off and on in all seasons).

You see a Rogers Peet Sale of some broken lots of their fine, finer and finest qualities.

You step right *in* and *out* with a \$12, \$17, \$22, \$27 or \$32 saving in your pocket.

Were \$40 to \$60 —

TREMONT ST. AT BROMFIELD

Tennis Players Take Opponents In Easy Matches

Varsity Defeats Amherst And Tufts While Freshman Take Worcester

With the tennis teams still in their immature stages, they have been doing very well against the competition up to date. The varsity team, in particular, has displayed unusual form in defeating the Jumbo representatives from Tufts, and the team from Amherst. With fine players like Eder, Lammers, Koerner, Hanley, Ross, Reagan, Spragens, and Harris giving Captain Freddy Feustel, who has been playing out of form so far this season, undiminishing support, the team had little trouble in defeating their formidable opponents.

Apparently Feustel's long winter lay-off has affected his game, and it will be necessary for him to do more conscientious practising than his teammates, who played squash during the winter months, in order to be in shape.

Coach Jack Summers has been more than satisfied with the showing of the freshman candidates. When tennis practice was called, more than thirty freshmen turned out for the team. Of the thirty-five candidates that answered the first call, not one has dropped out of his own accord.

At Worcester, the Institute freshman team defeated the representatives of Worcester Academy four matches to one. Lytle, seeded first freshman player, displayed brilliant form, and defeated his opponent 6-2, 6-1. Not to be outdone by his teammate, Joe Lempert dazzled his Worcester adversary with fine service "aces" and unusually fine back-court play.

The summary: Lytle (M.I.T.) defeated Sharp (W.A.) 6-2, 6-1; Frumberg (W.A.) defeated Weatherbee (M.I.T.) 3-6, 6-2, 7-3; Newman (M.I.T.) defeated I. Trevis (W.A.) 6-3, 6-3; Fisher (M.I.T.) defeated J. Trevis (W.A.) 6-1, 6-4; Lempert (M.I.T.) defeated Livingston (W.A.) 6-1, 6-3.

ALLIGATORS START SEASON TOMORROW

Technology's unofficial baseball representatives, the Alligators, will swing into action tomorrow afternoon at 2.30 o'clock, meeting the Boston University Jayvees at Coop Field. The team has not practised together very much as yet, but the interclass games have afforded a fair amount of preparation. Hall, of the Senior interclass team, has been selected to start on the mound, with Welch receiving.

Tomorrow's starting lineup is as follows: Coffey, cf; Johnson, 1b; Welch, c; Smith, lf; Wall, 3b; Wehmiller or Newman, rf; Amenta, ss; Hayden, 2b; Hall, p. The squad seems well fortified with hurlers of promise in Leslie, Newman, Jamieson, and Coon.

Manager William Schneider '32 has several other contests in view, but their definite dates have not yet been decided. Teams from Northeastern, Tufts, and Wentworth Institute will be included.

Class Game is Tied

Wednesday's interclass game between the Seniors and the Sophomores resulted in a 9-9 tie at the end of six innings, when the darkness put it to an end.

... all you could ask for!

OFFICIAL BULLETINS OF GENERAL INTEREST

Aldred Lecture

Friday, May 6, 3.00 p.m., Room 10-250

Dr. F. M. Becket

Dr. F. M. Becket, President of the Union Carbide and Carbon Research Laboratories, will speak on the "Development of the Ferro-Alloy Industry."

This is the last lecture of the year and is open to upperclassmen and the Faculty.

TRACK TEAM GOES TO HARVARD TODAY

Dixon Topples Old Record For Freshman Pole-Vault

Coach Oscar Hedlund's track squad will travel up to the Harvard Stadium today and tomorrow where they will try to clean up in the Greater Boston Inter-collegiate track meet. In all the events except the mile and two-mile run, the trials will be held today, with the finals coming tomorrow.

Owing to their good showing against the strong Bowdoin team last Saturday, the Engineers are expected to give a good account of themselves in this meet. Harold Dixon, who broke the freshman pole-vault record in the Andover meet

last Saturday, will be entered in this event again today. Dixon vaulted 11 feet and 3 inches, beating the old record by five-eighths of an inch. Coach Bob Bowie thinks that if the conditions are good tomorrow, Dixon can reach 11 feet and 6 inches. Coach Bowie also thinks that there is a good chance of the Institute high jump record being broken during this meet. Everett Coon seems to have the edge on the rest of the high-jumpers.

Bell Favored in Dashes

Dick Bell is conceded a good chance of winning both dashes. He will be up against a large field which will include entrants from Harvard, Boston College, Boston University, Tufts, and Northeastern. Jack Kearns should make things interesting in the two-mile race as should Wrigley in the broad jump and Robertson in the javelin.

T.C.A. FRESHMAN ADVISORS

Of the numerous cards sent out by the T.C.A. to secure Freshman Advisors for the coming year, only about fifty per cent have been answered. In order to complete the files, the T.C.A. requests that all those to whom cards have been sent please return them as soon as possible.

NOTICE

All Crew Members, Supervisors, Team Captains and Student subscription salespeople who wish to avail themselves of the opportunity for free scholarships made possible through the courtesy of the Leading Magazine Publishers again this year are requested to apply to the national organizer M. Anthony Steele, Jr., Box 343, San Juan, Porto Rico, stating qualifications fully.

DO YOU INHALE?

**"Why bring that up?"
—the cigarette trade asks!**

Copr., 1932.
The American
Tobacco Co.

FOR years there has been generally a striking avoidance of the word "inhale" in cigarette advertising. Why? Goodness only knows! For everybody inhales—knowingly or unknowingly! Every smoker breathes in some part of the smoke he or she draws out of a cigarette.

That's why it's all-important to be certain that your cigarette smoke is pure and clean—to be sure that you don't inhale certain impurities.

Lucky Strike *has* dared to raise this vital question—for it *has* solved the problem! It gives you the

protection you want... because certain impurities concealed in even the finest, mildest tobacco leaves are removed by Luckies' famous purifying process. Luckies created that process. Only Luckies have it!

"Fifty million smokers can't be wrong!" So whether you inhale knowingly or unknowingly—safeguard your delicate membranes!

"It's toasted"

Your Throat Protection
